

Edge Animate CC: Essentials

Edge Animate is Adobe's new web animation software that allows you to create animated content, such as web banners, that are supported by modern web browsers on mobile devices and desktop PCs. You will learn the animation process from start to finish - how to plan, lay out, stage, animate and publish your animation using various graphic formats and approaches. To bring your animation to the next level, you will learn to add interactivity and incorporate out-of-the-box web content.

Target Audience: Anyone who wishes to create animated content for websites Prerequisite: None

Duration 2 Days

Hours 9am to 6pm
