

Dreamweaver CC: Essentials

This course enables you with the necessary skills in building a website, creating and editing content. Instead of working with codes, you will be trained to take advantage of Dreamweaver's built-in features to design with typography, tables, lists, layouts, borders, backgrounds, navigations, images, interactive widgets, animation, videos and so on. Towards its completion, you will learn how to test your website against multiple (and older) browsers in Dreamweaver and publishing it to the World Wide Web.

Target Audience: New & Basic Users **Prerequisite:** Basic I.T. skill

Duration 2 Days

Hours 9am to 6pm

REGISTER NOW
